MyDefrag

To decrease the likelihood of causing problems, it allows you to backup the registry before you start and (by default) ignores MyDefrag is the advanced power option and is the top pick in Best Free Disk Defragmenter. It is novel in two ways: it uses a defragmentation and file placement engine, JKDefrag; and all activities are carried out by scripts. MyDefrag is effectively the graphical user interface through which you run the scripts.

MyDefrag comes with standard scripts so select the option (including "fast defrag" and "optimize daily") that best suits you. The output from the scripts themselves is unimpressive as it is largely unchanged from JKDefrag. Compared with other products, it uses a more advanced algorithm to optimize the placement of files on the disk. It also has a simple scheduler and scripts can also be run from Windows or other programs,

Note that MyDefrag requires administrator privilege and, if running from the Task Scheduler under Windows Vista or 7 then it is recommended that the SYSTEM account is used.
