Free Software Download of the Month

Remote Access Software

TeamViewer. It is very reliable, allows both attended and unattended control and has great features. There is a portable version of the viewer if you want to use an application or they also have a web-based control site that requires no installation to remotely control computers. The web-based version uses HTML and Flash so it is usable even if the browser or firewall doesn't allow Java or ActiveX. There is also a iOS & Android versions available, Imagin being able to access your computer from your mobile phone! TeamViewer is a commercial product and only allows you to use it for personal use. Any commercial use is prohibited by the TeamViewer use policy.
