*The inventor of the Waffle Iron did not like waffles.*

*In 1895 Hampshire police handed out the first ever speeding ticket, fining a man for doing 6mph!*

# Free Software Download of the Month

## VLC Media Player

VLC media player has a highly portable framework and works across different platforms. It is available for Windows, Macintosh, and many Linux flavors. VLC is the swiss army knife of media playback software that marvels you with compatibilities and capabilities.

The player sports an excellent menu based interface that is strictly simple and stripped down. The toolbars are fully customizable so you get to choose the buttons needed on the interface. The media player is powerful, light, fast and features fully customizable hotkeys that makes it very easy to use. VLC has the capability to repair broken content and supports many subtitle formats. Enabling the advanced controls sets buttons to record, take a snapshot, loop and frame by frame playback.

VLC has been one of the favorites for many crazy video cognoscenti and is entirely self-contained so that it remains unruffled against any esoteric video formats to make sure that no additional codecs are required for playback. This highly versatile player not only consumes media but also is a great choice for streaming/broadcasting media of any kind and plays many media types across various local and network sources. VLC media player is one of the best in DVD playback that made it first popular among many XP users especially with the bare minimum installation of their systems.
